

## Education

University of British  
Columbia

Expected Grad: 05.2022  
GPA: 3.80

### Bachelor of Commerce

Combined Major in Business and Computer Science

Courses: Software Engineering, Information Systems Analysis and Design

## Experience

### Program Manager Intern

Microsoft  
05.2021 - Present

// Led a team of 7 developers to build a Microsoft Teams app to empower users to make Microsoft Graph API requests with a goal of increased Graph adoption

// Created and prioritized a feature roadmap by conducting 12 user interviews, releasing user surveys, and continuously iterating on sponsor feedback

### Front-End Engineer Intern

Splunk Inc.  
01.2021 - 04.2021

// Executed on the development work on the Enterprise Dashboards Team to realize general availability of the product to over 12,000 customers

// Created a CI/CD pipeline for twelve different SplunkBase applications to increase reliability with automated test suites to realize faster releases

*Technologies: React, Node.js, JavaScript, Docker*

### Co-President

nwPlus  
09.2018 - 04.2021

// Led a team of over 50, overseeing seven different sub-teams to enable the execution of over 15 events and 3 hackathons, creating a sense of community within the team and raised over \$110k with my team as Sponsorship Director

// Created a technical workshop series, coordinating with eight different workshop leaders including “All About APIs” and “Technical Interviews 101”

### Software Developer Co-op

Visier Inc.  
01.2020 - 09.2020

// Coordinated the upgrade of the database management library from version 1 to 3 — projecting work required, writing user stories, and completing development work to increase security of the application

*Technologies: Scala, Gatling, Slick, SQL, JavaScript, Angular, jQuery*

### Business Technology Analyst

Deloitte  
01.2019 - 04.2019

// Managed the development and functional team as the scrum lead, to implement a customer relationship management system

// Drove greater efficiency within the project by initiating retrospectives and sprint planning and calendarized team members’ responsibilities to ensure the divvying of tasks was even and manageable

## Projects

### Budget Buddy [github](#)

A full-stack web application leveraging Google OAuth to help users gain greater insights into their spending and savings habits, utilizing the Material UI library

*Technologies: MongoDB, Express, React, Node.js, JavaScript, React*

### i-prep-you [github](#)

A web application where an application uploads a job description, interview questions will be selected and fed to the user and the videos of the answers will be parsed to provide the user with unique feedback as to how to improve

*Technologies: JavaScript, React, CSS*
